

ControlD

Hosted on: Unifi Cloud Gateway Ultra

IP: 192.168.1.1

The [ControlD application](#) is installed on this router to manage DNS.

Install

1. SSH into router
 1. Docs: <https://help.ui.com/hc/en-us/articles/204909374-Connecting-to-UniFi-with-Debug-Tools-SSH>
2. Run command:

```
sh -c 'sh -c "$(curl -sL https://api.control-d.com/dl)" -s cuayo73hcv forced'
```

 1. The resolver ID here "cuayo73hcv" comes from the ControlD Endpoint dashboard

Instructions from here: <https://docs.control-d.com/docs/ctrl-d#quick-install>

Upgrade

1. SSH into router
2. Run command:

```
/data/control-d/ctrl-d upgrade
```

 1. Can also run the install command again leaving off the "-s XXX forced" arguments
